

STORY W05. EDIT

As a user

I want to edit user information

so that I can keep things correct and up-to-date

WIREFRAMES:

[Home](#) [Users](#) [Register](#) [Add Match](#) [Matches](#) [Add Training](#) [Training](#)

Edit user

Userid: 0004

Name	<input type="text" value="Janssens"/>
First Name	<input type="text" value="Jan"/>
Email	<input type="text" value="jan.janssens@abc.be"/>
Role	<div><div>Choose the role ▾</div><div>User</div><div>Coordinator</div><div>Admin</div></div>
Group	<div><div>Youth ▾</div><div>Recreation</div><div>Youth</div><div>Elite</div></div>

Update

ACCEPTANCE CRITERIA:

- From the overview page, I should be able to edit each individual user.
- The current information for the user is already filled in in the form
- A user can edit their name, first name and email
- A user can select a new group and role
- The email address must remain unique in the application
- The userid can not change
- If a field contains invalid information, the form is shown again with an error message (server-side validation). Correct fields stay filled in.
- After the form is submitted, the overview page is shown again, with updated information.
